EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science and Engineering | CGPA: 8.34

Class XII (CBSE) 73.2%, Delhi World Public School | Class X 93.6%, Apeejay School

Vellore, Tamil Nadu

Jul 2023 – Jul 2027

Navi Mumbai | 2023 / 2021

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Java, SQL, R, HTML/CSS

Backend: FastAPI, Django, Express.js, PostgreSQL, MySQL, REST APIs

Frontend: Next.js, React, React Native (Expo), Tailwind CSS, WebGL

AI/ML: PyTorch, OpenCV, YOLOv8, LangChain, LangGraph, RAG, Pandas, NumPy, Generative AI, Computer Vision

Tools & Practices: Git/GitHub, GitHub Actions (CI/CD), Docker, AWS, Power BI, CVAT, Jupyter; Data Structures & Algorithms, OOP, DBMS

EXPERIENCE

Software Development Intern, LTIMindtree

May 2026 – Jul 2026

Client Project: Bharat Petroleum Corporation Ltd. (BPCL)

Mumbai, Maharashtra

- Developed a YOLOv8-based hazard and safety equipment detection system for BPCL facilities, detecting PPE compliance (helmets, safety vests), fire extinguishers, and restricted-zone intrusions across live CCTV feeds with 91% mAP@0.5.
- Curated and annotated a training dataset of 12,000+ frames spanning 25+ camera viewpoints; engineered augmentation strategies improving small-object recall by 14%.
- Optimized the inference pipeline to process multiple RTSP camera streams at 20+ FPS, reducing manual CCTV monitoring effort by an estimated 60%.

Frontend Developer, NextG

Jun 2026

Retail-Tech (Phygital Execution Engine)

Navi Mumbai, Maharashtra

- Designed and built a scroll-driven WebGL brand experience for a retail-tech engine coordinating 500K+ outlets: a real-time, cursor-reactive particle network that crystallizes into a coordinated lattice on scroll, written in dependency-free vanilla JavaScript.
- Owned creative direction through implementation, delivering multiple end-to-end landing-page redesign prototypes (React, TypeScript, and WebGL) and iterating on stakeholder feedback.

Project Intern, Globally GI

Jan 2026 – Apr 2026

Computer Vision & Data Engineering

Bangalore, Karnataka

- Designed a CVAT dataset expansion and annotation pipeline growing labeled data 3x; supported a deep learning food recognition model for calorie and nutrient estimation, contributing to a 9% accuracy improvement over baseline.

Software Development Intern, DIOnce Technology Pvt. Ltd.

May 2025 – Jul 2025

Full-Stack Development (Django)

Bangalore, Karnataka

- Delivered full-stack Django applications with authentication, database-driven order management, and secure payment processing serving live end users; contributed tested, documented pull requests to an open-source Django text analysis tool.

PROJECTS

Regis: AI-Assisted Compliance Platform for Indian NBFCs

Jun 2026 – Jul 2026

github.com/MrinaliBhardwaj/compliance-checker

- Built a full-stack compliance automation platform (FastAPI, PostgreSQL, Next.js, TypeScript) with 34 REST endpoints across 9 modules, 27 database tables, multi-tenant data isolation, authentication and role-based permissions, a maker-checker approval workflow, and an append-only audit trail spanning 18 action types.
- Engineered 5 deterministic rule engines over a library of 106 obligation templates across 29 Indian laws; a single company profile generates 367+ dated compliance obligations, working-day adjusted, in under 2 seconds end-to-end, with 98.4% AI-assisted evidence-to-obligation classification (192/195 documents).
- Shipped 137 automated tests at 84% coverage on GitHub Actions CI (including multi-tenant data-isolation tests against live PostgreSQL), plus a grounded, read-only AI copilot that answers with citations at 0.97 structured confidence.

Lexa: Large-Document Intelligence Platform (RAG)

Jul 2026 – Present

github.com/MrinaliBhardwaj/Lotus

- Architecting a RAG platform for 500–1,000-page PDFs delivering citation-grounded Q&A, clause and risk extraction, and semantic version diffs, built on FastAPI and PostgreSQL with a background job queue, cloud object storage, vector search, and pluggable LLM providers (Anthropic, OpenAI).
- Enforced production quality from day one with strict static type-checking (zero errors across 54 modules), 82% test coverage, and an automated CI gate on every commit.

Public Pulse: Civic Issue Reporting Platform

Jun 2025 – Oct 2025

github.com/MrinaliBhardwaj/public-pulse

- Built a cross-platform citizen app in React Native (Expo Router) with camera-first issue capture, feeds, voting, and comments, on an Express and PostgreSQL backend with Firebase authentication and AWS S3 media storage.
- Integrated a LangGraph and LangChain agent pipeline for AI-driven triage, classification, and analysis of citizen-submitted reports.

LEADERSHIP

- Design Coordinator, Riviera'26** (30K+ participants, Feb 2026): built the fest's visual identity and website (80K+ visits, 150+ assets).
- Design Executive, Entrepreneurship Cell** (Jan 2024 – Jan 2025): led design across 8+ events, mentoring 75+ student designers (10K+ views).
